Let's Start!

How can you stay safe if there's an earthquake?

Learning Outcome

Analyze issues relating to different topics and their solution in written and spoken situations according to work and social contexts.

Ask your partner:

- What can someone do to protect themselves if an earthquake occurs?
- Which countries experience the most severe earthquakes?

Can Do Statements

- I can talk about geography, climate and environmental problems.
- I can explain the sequence of events or describe feelings and states in the past.
- I can speculate about past events.

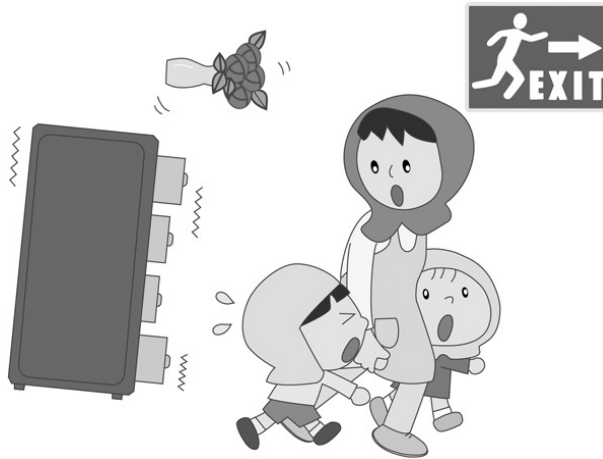

Let's Explore!

Emily experienced **The Kobe Earthquake*** in 1995.

* "The Kobe Earthquake" is also known as *The Hanshin Earthquake*.

Instructions: Read the text aloud.

In Japan there have been many earthquakes since the dawn of time. A teacher that I had was there in 1995 when a massive earthquake struck early in the morning. Ever since my teacher, Emily, relayed her earthquake experience in Kobe to me, I've had an acute fear of earthquakes! Emily told me that she couldn't have survived a very destructive earthquake by good fortune alone. People she knew in Japan had given her advice. Still, she could have been better prepared. She has become an expert in earthquake safety since she witnessed that massive earthquake in 1995.

Emily said that earthquake experts advise people to have a first aid kit on hand that includes bandages, scissors, and tweezers. She has also learned to hide under sturdy furniture when she feels the slightest tremor. She remembers standing against an inner wall, but she could have taken cover under a piece of furniture for better protection. She said the quake was so violent that her huge television inside a heavy cabinet was jumping around that morning.

She also could have known more about the aftershocks. She said those were absolutely terrifying. Since those aftershocks, she has been afraid to drive on bridges, overpasses and ramps because she saw a bridge collapse in an aftershock crushing a few cars. Emily now realizes she could have died because of the aftershocks. Luckily she was far away from any bridge or similar structure. She said that the aftershocks may be felt up to several months after the earthquake. Another thing to know is that damaged buildings should be avoided, and authorities will tell you when it is safe to enter a building again.

I moved to California three months ago, and since then my fear of earthquakes has transformed into full-blown anxiety. Still, I am glad Emily has given me safety tips and advice which I have kept in the forefront of my brain, just in case.

Let's Practice!

Many people could have died if they hadn't taken the proper measures.

Instructions: Match the sentences 1 to 5 to its corresponding half. Put the correct number on the space given.

1. Emily couldn't have survived...
2. She could've been...
3. Emily could have taken cover...
4. She could've known...
5. Emily could've died...

- ___ even better prepared for the earthquake in Kobe in 1995.
- ___ a very destructive earthquake by good fortune alone.
- ___ because of the aftershocks.
- ___ under a piece of furniture for better protection.
- ___ more about the terrifying aftershocks.

Let's Practice!

Japan has been hit by earthquakes for a very long time.

Instructions: Use the words from the boxes to correctly complete the sentences. Write the most appropriate phrase on the space given.

1 there have been have existed there has been	2 has live has experienced have experienced	3 have also learned has also learned has learned also	4 has be have been has been	5 has transformed have transformed has become
---	---	---	---	---

In Japan 1_____ many earthquakes since the dawn of time.

Because she 2_____ an earthquake, she 3_____ to hide under sturdy furniture when she feels the slightest tremor.

She 4_____ afraid to drive on bridges, overpasses and ramps because she saw a bridge collapse in an aftershock.

I moved to California, and my fear of earthquakes 5_____ into full-blown anxiety.

Extension Activity

Remember and learn more about earthquake safety.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Reread the dialogue and pay special attention to each tip that helps people stay safe during an earthquake.
- Tell someone the points you remember about being safe in an earthquake.
- Have them take notes.
- Read the notes and see if you left anything out.
- Go online and search for any more tips on being safe in an earthquake.

Self-Assessment

Yes

No

I read the dialogue again.

☐ ☐

I tell someone the tips that I remember about being safe in an earthquake.

☐ ☐

I check the notes my partner has taken to see if anything was left out.

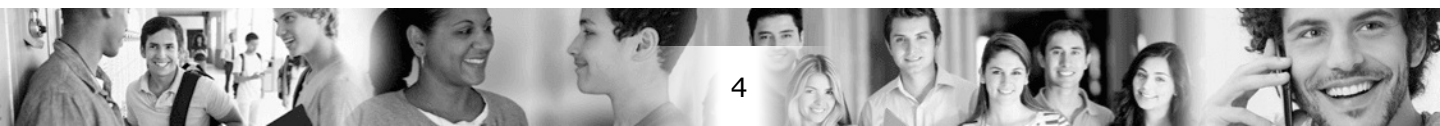

☐ ☐

I read about other earthquake safety tips online.

☐ ☐

Target Words

- acute** (adjective): very serious, extreme or severe
e.g. Ever since my teacher, Emily, relayed her earthquake experience in Kobe to me, I've had an acute fear of earthquakes!
- first aid kit** (noun): a package containing medical supplies
e.g. Emily said that earthquake experts advise people to have a first aid kit on hand that includes bandages, scissors, and tweezers.
- bandage** (noun): cloth used to cover and protect injuries
e.g. You should wrap a bandage around the injury.
- tweezers** (noun): small metal device used to hold or pull something
e.g. Earthquake experts advise people to have tweezers inside the first aid kit.
- structure** (noun): something built, such as a building or a bridge
e.g. Luckily, she was far away from any bridge or similar structure.
- tremor** (noun): a slight earthquake
e.g. She has also learned to hide under sturdy furniture when she feels the slightest tremor.
- to take cover** (expression): to protect oneself by ducking down into or under a shelter
e.g. She remembers standing against an inner wall, but she could have taken cover under a piece of furniture for better protection.
- aftershock** (noun): a sudden movement of the Earth's crust after an earthquake, which is less violent in nature
e.g. She also could have known more about the aftershocks.
- to collapse** (verb): to fall down suddenly
e.g. Since those aftershocks, she has been afraid to drive on bridges, overpasses and ramps because she saw a bridge collapse in an aftershock crushing a few cars.
- sturdy** (adjective): strong or solid
e.g. Because she has experienced an earthquake, she has also learned to hide under sturdy furniture when she feels the slightest tremor.

Learning Points

Present Perfect and Past Tenses

You can combine the Present Perfect tense with the Past Tense.

You combine the Present Perfect tense with the Past Tense to:

1. To describe events that have continued since a specific time in the past.

For example:

*The dog **has moved**.*

2. To describe repeated feelings towards a past event.

For example:

*Ever since I saw Star Wars, I **have wondered** if George Lucas would make another trilogy.*

You can also use the Present Perfect twice in the same sentence.

For example:

*Since I've **lived** in Toronto, I've **always gone** to the Kensington Market.*

Look at some examples from the text:

Examples:

- *Ever since my teacher, Emily, relayed her earthquake experience in Kobe to me, I've had an acute fear of earthquakes!*
- *She has become an expert in earthquake safety since she witnessed that massive earthquake in 1995.*
- *She has also learned to hide under sturdy furniture when she feels the slightest tremor.*
- *I moved to California three months ago, and since then my fear of earthquakes has transformed into full-blown anxiety.*

Learning Points

Speculating about Past Events: *Could Have*

You can use *could have* to speculate about past events. Specifically, you use it to speculate about scenarios different from what actually occurred.

You can use *could have* in the following situation:

1. To express past possibility

For example:

He **could have** been a doctor if he had applied himself in school.

1. To express past uncertainty

For example:

I'm not really sure who called. It **could have** been Candice, I guess.

You can use *could have* in the negative form.

For example:

He **couldn't have** been a doctor.

It **couldn't have** been Candice.

Couldn't have can also be used with a comparative adjective:

For example:

We chose the red version, and we **couldn't have** been happier.

Look at these examples from the text:

Examples:

- Emily told me that she couldn't have survived a very destructive earthquake by good fortune alone.
- She could have been even better prepared.
- She could have taken cover under a piece of furniture for better protection.
- She also could have known more about the aftershocks.
- Emily now realizes she could have died because of the aftershocks.
