Let's Start!

Tell me about volcanoes.

Learning Outcome

Describe detailed facts about events or actions in work and social contexts, in written or spoken situations.

Ask your partner:

- How much do you know about volcanoes?
- What volcanoes have you heard about?

Can Do Statements

- I can talk about geography, climate and environmental problems.
- I can speculate about something in the past.
- I can report facts about events or actions using words like *who*, *whom* and *whose*.

Let's Explore!

Living **beneath*** the volcano!

* "Beneath" is the same as *under*.

Instructions: Read the text aloud.

Most people who live at the base of a volcano or have witnessed a volcanic eruption share the belief that volcanoes are one of the most fascinating phenomena in nature. It is to me. When my family and I lived beneath the volcano as a child I wouldn't have been surprised if it had erupted. I didn't need to be reminded of the great force of nature and the possible destruction that might ensue. I gathered a lot of information which began the start of my career as a volcanologist. I hardly needed to go to university because of all that I learned on my own and all my father taught me. I wouldn't have gone at all until it became apparent that I couldn't become a bona fide volcanologist without a degree.

Volcanologists learn about volcanoes through the field of geology, which is the study of the earth and its rocks. My father, with whom I shared the passion of geology, told me that one of the main classifications in volcanology is determining whether a volcano is active or inactive. If a volcano is active, it is in a state of permanent eruption.

Volcanic material, which consists of heated rocks, ash and cinders, is projected with tremendous force. This volcanic material can fall on the outside of the volcano or return to the inside of the volcano through the crater and be ejected again. Lava that flows over the rim of the crater is even hot enough to melt ice in a matter of seconds.

My father, whose knowledge and experience was vast, told me that a volcano may be active for many years and then become dormant or inactive.

Volcanoes fascinate me and my father because they show the violent energy which is hidden under the earth. Although giant eruptions are not common, they remain proof there are forces under the earth that are beyond human control.

We wouldn't have lived by a volcano for such a long period of time, but we had such a keen fascination with them. Nobody needed to tell us that we were taking an enormous risk by living there.

Let's Practice!

Ross is a big fan of nature.

Instructions: Use the words from the Word Bank to correctly complete the sentences. Read the sentences aloud. Check your pronunciation with your instructor.

Word Bank:

who live - with whom I shared - with whom - whose studies were - whose knowledge

- Most people _____ at the base of a volcano or have witnessed a volcanic eruption share the belief that volcanoes are one of the most fascinating phenomena in nature.
- My father, _____ I shared the passion of geology, told me that one of the main classifications in volcanology is determining whether a volcano is active or inactive.
- My father, _____ and experience was vast, told me that a volcano may be active for many years and then become dormant or inactive.
- The volcanologists _____ the basis of my research taught at the university I went to.
- The volcanologists _____ my passion all lived near a volcano when they were younger.

Let's Practice!

Ross wouldn't have been surprised if the volcano had erupted!

Instructions: Use the words from the Word Bank to correctly complete the sentences. Read the sentences aloud. Check your pronunciation with your instructor.

Word Bank:

hardly needed to / wouldn't have gone / wouldn't have been / needed to tell us / didn't need to

- I _____ surprised if it had erupted.
- I _____ be reminded of the great force of nature and the possible destruction that might ensue.
- Nobody _____ that we were taking an enormous risk by living there.
- I _____ go to university because of all that I learned on my own and all my father taught me.
- I _____ at all until it became apparent that I couldn't become a bonafide volcanologist without a degree.

Extension Activity

Watch the volcano watchers.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Go online and watch a video on volcano watchers on YouTube.
- Take notes on the main ideas.
- Share your notes with a friend.
- Discuss what you think of the people in the video and what they do.

Self-Assessment

Yes

No

I watch a video about volcano watchers.

☐ ☐

I write down main ideas.

☐ ☐

I tell a friend what I saw, learned and wrote down.

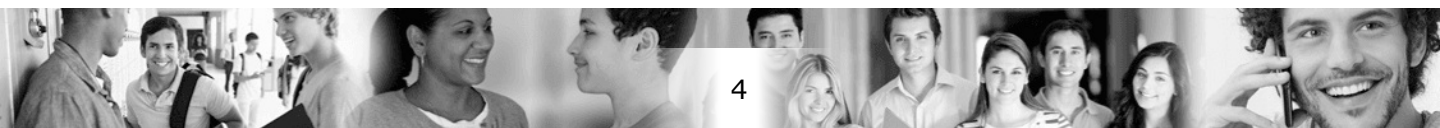

☐ ☐

I discuss with my friend what I think about what the people in the video do.

☐ ☐

Target Words

- base** (noun): the bottom part of an object
e.g. Most people who live at the base of a volcano or have witnessed a volcanic eruption share the belief that volcanoes are one of the most fascinating phenomena in nature.
- phenomena** (noun): anything that is or can be experienced or felt
e.g. Volcanoes are one of the most fascinating phenomena in nature.
- volcanologist** (noun): geologist who studies the eruptive activity and formation of volcanoes
e.g. I gathered a lot of information which began the start of my career as a volcanologist.
- apparent** (adjective): able to be seen or understood
e.g. I wouldn't have gone at all until it became apparent that I couldn't become a bona fide volcanologist without a degree.
- bona fide** (adjective): authentic or genuine
e.g. I couldn't become a bona fide volcanologist without a degree.
- permanent** (adjective): lasting for a long time or forever
e.g. If a volcano is active, it is in a state of permanent eruption.
- cinders** (noun): small pieces of partly burned coal or wood
e.g. Volcanic material, which consists of heated rocks, ash and cinders, is projected with tremendous force.
- to eject** (verb): to forcefully and quickly send out
e.g. This volcanic material can fall on the outside of the volcano or return to the inside of the volcano through the crater and be ejected again.
- dormant** (adjective): not presently active
e.g. A volcano may be active for many years and then become dormant or inactive.
- inactive** (adjective): doing nothing
e.g. Inactive volcanoes are also monitored.

Learning Points

Speculating about Past Events: *Would Have* and *Didn't Need To*

You can use **would have** and **didn't need to** to speculate about past events.

You can use **would have** to express events that did not actually happen.

For example:

*I **would have** called you, but I didn't want to use up any more minutes on my cell.*

You can also use **would have** to make assumptions about the past.

For example:

*Someone left the door open? That **would have** been James, most likely.*

You can use **didn't need to** to express an unnecessary action that was not actually done.

*My computer was a bit slow, but fortunately it **didn't need to** be replaced.*

Note: You can also use **needn't + have** to refer to an unnecessary action that was actually done, but this is mainly used in British English.

For example:

*You **needn't have** come all the way out here to visit me.*

Here are a few examples from the text:

Examples:

- *I **didn't need to** be reminded of the great force of nature and the possible destruction that might ensue.*
- *We **wouldn't have lived** by a volcano for such a long period of time, but we had such a keen fascination with them.*

Learning Points

Relative Clauses: Who, Whom and Whose

The relative pronouns **who**, **whom** and **whose** are used to provide information about the people introduced in your sentences.

You use **who** to refer to the subject of a sentence, if it is a person.

For example:

*He is the person **who** cleans the floors.*

Whom is the object form of **who**.

For example:

*He is the person **whom** I met at the conference last week.*

Note: In colloquial speech, **who** is commonly used in place of **whom**.

You also use **whom** when it follows a preposition.

For example:

*To **whom** should I send the payment?*

Note: Again, in colloquial speech, **who** is commonly used in place of **whom**.

For example: **Who** should I send the payment to?

You use **whose** when you are talking about possession.

For example:

*This is my friend **whose** brother owns the bakery.
My friend, **whose** brother owns a bakery, is coming over.*

Here are a few examples from the text:

Examples:

- Most people **who** live at the base of a volcano have witnessed a volcanic eruption .
- My father, with **whom** I shared the passion of geology , told me that one of the main classifications in volcanology is determining whether a volcano is active or inactive.
- My father, **whose** knowledge and experience was vast, told me that a volcano may be active for many years.
